

MEDIA RELEASE 17 August 2015

Following on from the launch of the Tasmanian branch of Australian Electric Vehicles Association (AEVA) on 15 August, Tas Dragway will be supporting electric vehicles to set an official Tasmanian drag racing record for electric cars, and unofficial National record.

This is to be conducted under the rules and guidelines of the Australian National Drag Racing Association (ANDRA) and we trust it will highlight the place that Tasmania has in renewable energy.

The record setting will occur at Tas Dragway on Powranna Rd (marked turnoff at Epping Forest 35km south of Launceston) on 29th August between 11am and 12 noon.

All and any road registered vehicles with an exclusively electric source of energy are invited to enter and participate.

Racing will be over the current 1/8 mile race distance (approx. 202 metres). We expect electric vehicles to be highly competitive against the best of registered performance V8 drag racing cars.

We invite media coverage of this milestone event in Tasmanian renewable energy. Please RSVP to the contacts below and your details will be noted at the venue entry:

Contacts: John Hanley 0400 426 539
 Tim Parremore 0408 464 698

Tas Dragway is committed to the sustainable provision of drag racing in Tasmania as a safe place for interested motorists to engage in activities that are unacceptable on Tasmanian public roads.
